AMENDMENTS TO THE CLAIMS

Please **ADD** claim 11 as shown below.

Please **AMEND** claims 1-10 as shown below.

The following is a complete list of all claims in this application.

1. (Currently Amended) A thin film transistor (TFT) array substrate for a liquid crystal display, comprising:

an insulating substrate including a display area and a peripheral area surrounding the display area, the peripheral area including an upper a first peripheral region arranged along a first edge of above the display area and a lower second peripheral region arranged below along a second edge of the display area;

<u>a plurality of signal lines formed on the insulating substrate, wherein the signal lines are</u>
<u>bundled and divided</u> into a plurality of blocks, each block including a predetermined number of signal lines;

a plurality of first upper repair lines formed in the upper first peripheral region, each crossing the signal lines of the substrate, wherein the plurality of first upper repair lines cross one or more of the plurality of blocks;

a plurality of second upper repair lines line formed in the upper first peripheral region and crossing of the substrate, wherein the second upper repair lines cross all of the plurality of signal lines;

Woon-Yong PARK Application No.: 09/636,466

a plurality of first lower third repair lines formed at in the lower second peripheral region and of the substrate, connected to the corresponding first upper repair lines corresponding thereto, wherein the first lower each third repair lines crosses line crosses the signal lines crossed by the corresponding first upper repair line lines; and

a plurality of second lower fourth repair lines line formed at in the lower second peripheral region of the substrate, wherein the plurality of second lower repair lines cross and crossing all of the plurality of signal lines;

a plurality of upper connection members crossing the first upper repair lines and the second upper repair lines; and

a plurality of lower connection members crossing the first lower repair lines and the second lower repair lines.

- 2. (Currently Amended) The thin film transistor <u>TFT</u> array substrate of claim 1 11, further comprising: a plurality of first interconnection lines, each interconnecting the first upper repair lines line and the first lower third repair lines line corresponding thereto.
- 3. (Currently Amended) The thin film transistor <u>TFT</u> array substrate of claim 2, wherein the <u>each</u> first <u>repair line upper repair lines extend from is connected to two or more dummy pins of <u>an</u> integrated <u>eireuits circuit</u> for driving the signal lines, and <u>are coupled</u> to the first interconnection <u>lines line</u>.</u>

Woon-Yong PARK Application No.: 09/636,466

- 4. (Currently Amended) The thin film transistor <u>TFT</u> array substrate of claim 2, further comprising: a plurality of second interconnection lines, <u>each</u> interconnecting the first <u>upper repair lines line</u> and the <u>first lower third</u> repair <u>lines line corresponding thereto</u>.
- 5. (Currently Amended) The thin film transistor <u>TFT</u> array substrate of claim 1 <u>11</u>, further comprising:

a plurality of third upper fifth repair lines line formed at in the upper first peripheral region of the substrate while and crossing the upper first connection members and all of the plurality of signal lines; and

a plurality of third lower <u>sixth</u> repair <u>lines line</u> formed at <u>in</u> the <u>lower second peripheral</u> region of the <u>substrate while</u> and crossing the <u>lower second</u> connection members and all of the <u>plurality of signal lines</u>.

- 6. (Currently Amended) The thin film transistor <u>TFT</u> array substrate of claim 1 11, wherein each block of the signal lines of each block are comprises the signal lines connected to an integrated circuit.
- 7. (Currently Amended) The thin film transistor <u>TFT</u> array substrate of claim 6, wherein the first upper line and the first lower third repair line cross two blocks of the signal lines of two neighboring blocks.

Woon-Yong PARK Application No.: 09/636,466

- 8. (Currently Amended) The thin film transistor <u>TFT</u> array substrate of claim 7, wherein one or more of the <u>upper first</u> connection member and the <u>lower second</u> connection member are <u>formed at provided in each block of the signal lines</u>.
- 9. (Currently Amended) The thin film transistor TFT array substrate of claim 4, wherein the first interconnection line and the second interconnection line are formed on a printed circuit board.
- 10. (Currently Amended) The thin film transistor <u>TFT</u> array substrate of claim 4, further comprising: a signal amplifying circuit <u>provided</u> in the first interconnection line and the second interconnection line.
 - 11. (New) The TFT array substrate of claim 1, further comprising:

a plurality of first connection members, each crossing the first repair line and the second repair line; and

a plurality of second connection members, each crossing the third repair line and the fourth repair line.
